DMV GROUP

CAPABILITY STATEMENT

Infrastructure / Security / Technology / Engineering

DRAFT FOR INTERNAL REVIEW - NOT FOR DISTRIBUTION

COMPANY OVERVIEW

DMV Group brings together construction and development, perimeter security, technology, and engineering services. Project support spans initial site planning, coordinated delivery, and final handover, according to the agreed scope.

CORE CAPABILITIES

Construction & Development

Site planning, land preparation, permitting support, ground-up commercial and industrial construction, structural framing, and building envelope installation.

Project Delivery

General contracting, construction management, quality assurance, turnkey delivery, closeout, and handover.

Gates & Security

Automatic gates, perimeter fencing, vehicle barriers, bollards, access control, and related security systems.

PROJECT DELIVERABLES

- Site surveys and assessments
- Drawings and submittals
- Testing and commissioning records
- As-built documentation and maintenance plans

Deliverables depend on the agreed project scope.
